Summary

Dedicated **AI & Machine Learning Engineer** with hands-on experience in full-stack AI development, integrating large language models (LLMs), and building secure, scalable applications. Certified in Generative AI, Deep Learning, and Ethical Hacking, combining practical problem-solving capabilities with a strict focus on system integrity. Proven track record of leading campus initiatives and core technical teams at VIT Bhopal. Actively seeking roles in **AI engineering and secure software development** to deliver impactful, real-world technological solutions.

Technical Skills

- **Languages:** C, C++, Python
- **AI / ML:** Machine Learning, Deep Learning, Generative AI, NLP
- **Frameworks:** PyTorch, Scikit-Learn, TensorFlow, Hugging Face, LangChain, FastAPI
- **CyberSecurity:** Linux
- **Cloud:** AWS, Google Cloud Platform(Arcade Legend), Docker
- **Data:** SQL, Vector Databases
- **Tools:** Git, GitHub, Ollama, Agile/Scrum

Work Experience

AI Intern

Dec 2025 – January 2026

Infosys — India

- Developed a full-stack AI-powered assistant using FastAPI, Streamlit, and HuggingFace LLMs to analyze car lease/loan contracts, detect hidden fees, and auto-generate negotiation emails.
- Engineered a robust document processing pipeline utilizing Tesseract OCR, PyPDF2, and OpenCV to accurately extract financial terms from unstructured PDFs and scanned images.
- Designed and implemented a proprietary Fairness Score algorithm that evaluates contract terms against real-time market benchmarks via NHTSA and MarketCheck API integrations.
- Containerized the multi-service architecture using Docker Compose and established a comprehensive testing suite with Pytest to ensure system reliability and seamless deployment.

Projects

Deep Research AI Agent(Langchain + Llama3 + Streamlit)

- Developed an AI-powered research assistant that autonomously investigates user-provided topics across the web, synthesizes complex information, and generates structured, downloadable PDF reports.
- Engineered a three-tier multi-agent pipeline (Researcher, Summarizer, Presenter) using LangChain and Llama 3.3 to conduct real-time web scraping (via DuckDuckGo), automated data de-duplication, and accurate citation tracking.
- Built and deployed an interactive Streamlit web application featuring configurable parameters for research depth and breadth, allowing users to easily tailor the scope of their research.

Driver Drowsiness Detection System (ML + Computer Vision)

- Developed a real-time driver monitoring system using computer vision and deep learning (YOLO) to detect eye closure and fatigue patterns.
- Implemented OpenCV-based video processing and optimized model inference for real-time performance, ensuring accurate detection under varying lighting and driving conditions.
- Created a custom dataset for the project and installed a feature which reduced accident risk through instant alerts.

Certifications

- Certified Ethical Hacker (EC Council)
- Applied Machine Learning in Python (University of Michigan)
- Google IT Support Certificate (Google)
- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional (Oracle)
- Artificial Intelligence Primer Certification (Infosys)
- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate (Oracle)

Education

Bachelor of Technology (B.Tech) – Computer Science and Engineering (AI & ML)

VIT Bhopal University

2023 – 2027
