Summary

Dedicated **AI & Machine Learning Engineer** with hands-on experience building **LLM-powered, RAG, and multi-agent systems**, alongside scalable and secure AI applications. Experienced in developing **production-oriented AI systems** with a strong focus on reliability, performance, and security. Seeking a challenging role as an **AI/ML Engineer** to architect innovative, scalable intelligence solutions and drive impactful business outcomes.

Technical Skills

- **Languages:** C, C++, Python
- **AI / ML:** Machine Learning, Deep Learning, Generative AI, NLP
- **Frameworks:** PyTorch, Scikit-Learn, TensorFlow, Hugging Face, LangChain, FastAPI
- **CyberSecurity:** Linux
- **Cloud:** AWS, Google Cloud Platform (Arcade Legend), Docker
- **Data:** SQL, Vector Databases
- **Tools:** Git, GitHub, Ollama, Agile/Scrum

Work Experience

AI Intern

July 2026 – Current

Single Interface — Gurgaon, India

- Built **RAG pipelines** using LangChain, vector databases, embeddings, and reranking.
- Developed **multi-agent systems** using LangGraph for autonomous task planning and execution.
- Implemented **MCP servers/tools** for LLM-based tool use and external system integration.
- Built **LLM observability & evaluation** pipelines for tracing, RAG quality, latency, and hallucinations.
- Developed **LLM Gateway infrastructure** for multi-model routing, fallbacks, monitoring, and cost optimization.

AI Intern

Dec 2025 – Jan 2026

Infosys — India

- Built an AI contract assistant using FastAPI, Streamlit, and HuggingFace LLMs.
- Developed OCR-based document extraction using Tesseract, PyPDF2, and OpenCV.
- Built a Fairness Score using NHTSA and MarketCheck market benchmarks.
- Containerized services with Docker Compose and implemented Pytest testing.

Projects

Deep Research AI Agent (Langchain + Llama3 + Streamlit)

- Developed an AI-powered research assistant that autonomously investigates user-provided topics across the web, synthesizes complex information, and generates structured, downloadable PDF reports.
- Engineered a three-tier multi-agent pipeline (Researcher, Summarizer, Presenter) using LangChain and Llama 3.3 to conduct real-time web scraping (via DuckDuckGo), automated data de-duplication, and accurate citation tracking.
- Built and deployed an interactive Streamlit web application featuring configurable parameters for research depth and breadth, allowing users to easily tailor the scope of their research.

Driver Drowsiness Detection System (ML + Computer Vision)

- Developed a real-time driver monitoring system using YOLO to detect eye closure and fatigue.
- Implemented OpenCV video processing and optimized inference for real-time detection under varying conditions.
- Created a custom dataset and implemented instant alerts to reduce accident risk.

Research Publications

- **RAJMA AI-Driven Resume Analyzer for Creation, Customization, Screening, and Job Matching** — April 2025
International Journal of Multidisciplinary Research in Science, Engineering and Technology (IJMRSET)
[Link to Paper](#)

Certifications

- **Certified Ethical Hacker** (EC Council)
- **Applied Machine Learning in Python** (University of Michigan)
- **Google IT Support Certificate** (Google)
- **OCI 2025 Certified Generative AI Pro** (Oracle)
- **Artificial Intelligence Primer** (Infosys)
- **OCI 2025 Certified AI Foundations** (Oracle)

Education

Bachelor of Technology (B.Tech) – Computer Science and Engineering (AI & ML)
VIT Bhopal University

2023 – 2027
